

Erika NGAN

Senior Research Manager

The Hong Kong Research Institute of Textiles and Apparel

Dr Erika NGAN is the Senior Research Manager at the Hong Kong Research Institute of Textiles and Apparel, with over ten years of experience in the testing and evaluation of functional textiles. Since joining HKRITA, she has collaborated extensively with the textile industry on diverse research areas including fibre closed-loop systems, bio-based solutions to microplastics, performance textiles, and technology scale-up. Her current work focuses on driving sustainability through innovation and stakeholder engagement. She has worked closely with HKSI on developing suits for athletes in different sports.
